DETAILED ACTION

Allowable Subject Matter

1. Claims 1-7, 9-12, 14-16 and 18-40 allowed.
2. The following is an examiner's statement of reasons for allowance: With respect to independent claims 1, 9, 15, 22, 26 and 30, the instant invention is directed to a network termination unit, a content analyzer, a method of transmitting use patterns and an article containing machine-readable code that when executed causes the machine to execute the method steps.

The relevant prior art of record, such as **Seidman et al (6,298,482)** discloses a system for two-way digital multimedia broadcast and interactive services and creating and transmission of records of user viewing selection histories. **Zintel (6,779,004)** discloses dynamic connectivity among distributed devices and services, where packets are identified using discovery protocol that uniquely identifies use patterns. **Dobbins et al (7,016,956)** disclose directory-enabled intelligent broadband service switch. **Inoue et al (7,003,790)** disclose broadcast program selection history information apparatus and method. **Hunter et al (6,363,422)** disclose multi-capability monitoring and control intranet for facilities management system. However, neither **Seidman, Zintel, Dobbins, Inoue nor Hunter** and any of the cited references teach or suggest, alone or in combination the feature of "...transmit the services available information in the use pattern packets..."; "...decode use pattern packets...characterize the network termination unit by that viewing information.."; etc. and other combination of claims limitation as recited in the various independent claims 1, 9, 15, 22, 26 and 30.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Maissel et al (6,637,029) disclose an intelligent EPG and providing ads or alerts based on audience statistical viewing data
